Sundries Virus removal/antibacterial spray

Efil

CHARACTERISTICS

- Form: Liquid spray
- Efil is an antibacterial and virus removal spray, which contains silver ions, zinc ions, and ethanol. This product has disinfecting, antibacterial, antifungal, virus removing, antiviral, and deodorizing effects.
- The antibacterial, antiviral, and antifungal effects last for 24 hours.
- No chlorine-based ingredients are included.
- Product efficacy and safety have been confirmed through various tests.

※ This product is not effective against all bacteria, viruses, molds, and odors. The duration of the effects may vary depending on the usage and storage environment. The effect is limited to the applied area.

PRECAUTIONS FOR USE

1. Do not spray on persons or animals.
2. Use only as directed.
3. The product may modify (discolor) certain metals and other materials.
4. Odors caused by soil may persist even after application.
5. Persons sensitive or allergic to alcohol or prone to skin rashes are advised to take care not to touch or inhale the mist during application.
6. When using in a small space, ventilate well.
7. Do not mix with chlorine-based products (danger of toxic gas).
8. Do not use near electrical appliances since this may cause a breakdown; do not use near fire or flammables (danger of ignition).
9. Store in a cool place away from direct sunlight or fire; avoid storing in places that can get very hot (such as inside an automobile); keep out of children's reach.

DO NOT USE FOR

- Do not apply to leather or delicate silk products. The product may cause spots or damage to wool, silk, rayon, acetate, and cupro, and other fabrics that are weak in water, not washable, or treated for waterproof or water-repellent effects; test on an inconspicuous spot beforehand.

- Do not apply to white or light-colored textiles, leather, plain wood, paulownia wood, surfaces coated with water-soluble wax, paint or varnish, or acrylic or styrene plastics; the product may cause spots or discoloration.

FIRST AID

- If swallowed: Do not force vomiting. Give/drink milk or water, and seek medical attention.
- Contact with eyes: Immediately rinse with great deal of water, and seek medical attention.

HOW TO USE

[Disinfection and antibacterial, antifungal, virus removal, and antiviral effects]

Remove any contaminating objects from the surface, and spray about 20 cm away from the surface until it is evenly and sufficiently moist. Leave it for a while before use.

With fabrics, use only when they are fully dry.

[Deodorization]

Spray directly on the object several times.

- * When you start using this product, press the button several times until it starts to spray.
- * Do not use this product upside down.

USES

Disinfection and antibacterial, antifungal, virus removal, antiviral, and deodorant treatment of surfaces.

On fabric products (e.g., clothes, carpets, bedding such as futons, towels, strollers), masks, indoor surfaces (e.g., floors, walls, switches, doorknobs, toilet seats, toilet bowls, bed rails), PCs, smartphones, vomit, excrement, etc.

- * To apply to face masks, spray on the outer side, and dry well before wearing.
- * To apply to a smartphone or other electronic devices, apply with a soft cloth, and do not spray directly on the device.

Be careful when using near electrical devices as malfunction may occur.

Check the instruction manual of the device carefully before using this product.

- * Some materials, such as doorknobs or electronic devices, and some other metals may be deteriorated or discolored.
